The D-Link DWM-315 4G LTE M2M Router is an easy-to-deploy, high performance 3G/4G router. It features a dedicated Fast Ethernet port and dual-SIM 4G LTE mobile broadband for maximum redundancy and flexibility for intense Machine to Machine applications. Powerful VPN tools and advanced remote management combined with ease of use make the DWM-315 ideal for both large-scale and individual deployments.

**Connectivity Where You Need It Most**

Easily connect to your high-speed 3G/4G LTE mobile connection with the DWM-315 4G LTE M2M Router, and enjoy fast downlink speeds of up to 300 Mbps¹ and uplink speeds up to 50 Mbps¹, giving you the speed you need for fast, responsive Internet access. Deploy it in a remote location to access IP cameras and systems remotely. The blazing fast LTE connection allows multiple users to access e-mail and stream music and video on the go. Configurable dual-SIM fallback provides reliability and flexibility in mixed network environments.

**Reliable High Speed Virtual Private Networks**

The DWM-315 4G LTE M2M Router’s integrated VPN Client and Server support almost any VPN policy. The router’s hardware engine can support and manage multiple VPN configurations. It supports IPSec, PPTP, L2TPv2, and GRE protocols in Server mode, and handles pass-through traffic as well. Advanced VPN configuration options include multiple encryption options, key management, negotiation modes, and VPN authentication using an internal user database.

**Robust**

The industrial grade casing means the DWM-315 provides reliable high-speed connectivity in extreme conditions. The corrosion-resistant zinc-plated steel case and wide operating temperature and humidity tolerance mean that the DWM-315 is ready for the most demanding M2M applications in virtually any environment. Wall mounts allow the DWM-315 to be mounted virtually anywhere for optimal connectivity. Flexible power input range allows the router to be powered by any convenient power source.

$^1$ Data throughput figures are maximum theoretical values and can vary due to network conditions and router configuration.

$^2$ Mobile network support varies by SKU.

$^3$ Additional bands and CA combinations may apply.

$^4$ Requires D-Link ECS Remote Management software.

1. Data rates are theoretical. Data transfer rate depends on network capacity, signal strength, and environmental factors.
2. Available frequencies and speeds vary and may not be available in all regions.
3. LTE-FDD B29 and B32 support Rx only, and in 2×CA they are only for secondary component carrier.
